

## Network, Share Resources

The Mississippi Partnership for Comprehensive Cancer Control Coalition (MP3C) is a group of individuals and organizations joining together to make a difference in the lives of Mississippians. Through this collaborative effort, the coalition has developed a comprehensive cancer control plan to reduce cancer incidence, morbidity, and mortality in the state of Mississippi. You are cordially invited to participate in one of five workgroups to implement the state comprehensive cancer control plan.

### Estimated Cancer Incidence (Cases) in 2007

### Estimated Cancer Mortality (Deaths) in 2007

### Cancer-Related Behaviors in Mississippi

Current adult cigarette smokers	24%
Adults eating 5+ servings of fruit and vegetables daily	16%
Women having had a mammogram in the past year	57%
Adults having had a colonoscopy exam in past year*	29%
Adults reporting no physical activity during the past month	32%
Obese Adults in Mississippi	30%

City, State, and Zip: \_\_\_\_\_

Telephone #: \_\_\_\_\_

Email Address: \_\_\_\_\_

- ✓ Yes, I am interested in participating on a workgroup:

- Prevention
- Early Detection
- Diagnosis/Treatment
- Quality of Life/ Survivorship
- Surveillance

Signature \_\_\_\_\_ Date \_\_\_\_\_

Please submit your registration form by fax to: 601-576-7444 or by postal services

## What is Comprehensive Cancer Control?

Comprehensive Cancer Control (CCC) is a collaborative process through which a community pools resources to reduce the burden of cancer that results in risk reduction, early detection, better treatment, and enhanced survivorship. These efforts encourage healthy lifestyles, promote recommended cancer screening guidelines and tests, increase access to quality cancer care, and improve quality of life for cancer survivors.

## Why is it important?

The fight against cancer will not be won without a comprehensive approach. While the number of cancer prevention and control programs have multiplied in Mississippi and elsewhere, it has become obvious that duplication of effort and missed opportunities occur when organizations and individuals confine themselves to specific cancers. By working together, however, we can join the ranks of other states that have developed and implemented statewide, comprehensive cancer control plans.

## What can be done?

- Pass meaningful legislation in our state that helps prevent cancer and promote better access to medical care for detection and treatment.
- Educate the public on the importance of early detection of cancer.
- Work with businesses and industry to adopt smoke free business policies and provide resources to help employees quit smoking.
- Ensure that adequate patient support services are available and accessible for cancer patients and their families.
- Institute more effective health education policies in Mississippi's schools.
- **Join the Mississippi Partnership for Comprehensive Cancer Control to implement a plan that addresses these and other cancer-related issues.**
